# AppServ-win32.2.5.10 Installation Step

4. Select all appserv package components it's, and then click [ Next ] to go to next step.

# AppServ-win32.2.5.10 Installation Step

5. Please specify Apache Configure, and then click [ Next ] to go to next step.

The image shows a Windows installation window titled "AppServ 2.5.10 Setup". The window has a standard Windows XP-style title bar with minimize, maximize, and close buttons. Below the title bar, there is a logo of a colorful feather and the text "Apache HTTP Server Information" followed by "Please enter your server's information.".

The main content area contains three input fields, all of which are enclosed in a red rounded rectangle:

- Server Name (e.g. www.appservnetwork.com): The input field contains "localhost".
- Administrator's Email Address (e.g. webmaster@gmail.com): The input field contains "root@localhost".
- Apache HTTP Port (Default : 80): The input field contains "80".

At the bottom of the window, there is a status bar that says "Nullsoft Install System v2.18". Below this, there are three buttons: "< Back", "Next >" (which is highlighted in blue), and "Cancel".

# AppServ-win32.2.5.10
